

Stop the Falls.

Remember: Screens keep bugs out, not kids in!

You can save a child's life:

- Never open windows more than 4 inches
- Open windows from the top down, if possible
- Move furniture away from windows
- Install window stops or releasable child-safety window guards

Follow the 4-inch rule
Don't open windows more than 4 inches!

This week, three Chicago-area kids will be hospitalized after falling from a window.
